

Product Stewardship Services

Today, buyers are ever conscious of their corporate reputations and are requiring better performance and tighter compliance specifications from their suppliers.

Solutions in Science (SiS) is with you throughout the lifecycle of your operation. We provide our clients with premiere expertise from inception with patent support and due diligence, through production with industrial hygiene and manufacturing efficiency support. SiS is also there in aid of distribution and marketing with regulatory compliance and product liability assistance. We can also help in your product/process end-of-life with expertise in environmental assessment, waste impact, permitting, and recycling design.

SiS specializes in regulatory compliance and has extensive experience not only in the US and the European Union, but also similar registration schemes globally (Canada, Mexico, Australia, Japan, China, etc.). We can provide full

toxicological assessment services, laboratory study management, chemical and environmental modelling, and life cycle analysis. We are dedicated to serving our clients by minimizing your cost liabilities while maximizing your realized benefits.
