

Regulatory Compliance Services

Today's global marketplace can be treacherous. Selling across multiple jurisdictions means multiple, overlapping regulatory compliance requirements.

Solutions in Science (SiS) is with you throughout the lifecycle of your operation. We provide support and guidance with product compliance, permitting and notifications, as well as industrial safety and manufacturing efficiency support. SiS is also there with product liability support.

SiS specializes in regulatory compliance and has extensive experience with not only the US and European Union legal requirements, but also similar registration schemes globally (Canada, Mexico, Australia, Japan, China, etc.). We can provide full toxicological assessment services, laboratory study management, chemical and environmental modelling, and life cycle analysis. We are dedicated to serving our clients by

minimizing your cost liabilities while maximizing your realized benefits.
